

### An innovative approach to climate control

Air Curtains from Blue Giant have a revolutionary aerodynamic compression chamber design that allows for highly efficient air flow.

### **Open Door Protection**

Blue Giant air curtains provide superior environmental separation by keeping out cold winds in winter and hot breezes in summer without compromising visibility levels, ensuring that pedestrian and vehicle traffic remain safe all year round.

### Partner in Building Energy-Efficiency

Stratified heat is recirculated inside the building, cutting down on heating costs during cold weather conditions. Post-installation energy savings typically cover the purchase price of an air curtain within a year.

### Supports Workplace Integrity

Internal temperatures remain stable while doors and windows are open. Walls of forced air prevent pests and airborne pollutants from infiltrating work environments, maintaining high cleanliness levels that certain applications require.

### Versatile Applications

Blue Giant air curtains are powerful, high-performance units that are quiet, adjustable and easy to install in a variety of configurations to suit different needs: warehouses, manufacturing facilities, freezers, retail entrances, and more.

### **Mounting Options**

Air curtain mounting methods vary according to doorway size, intended application, and obstacles in the vicinity of the install site. If none of the mounting styles shown below are compatible with your application, please contact us.

**Tandem Mounting:** If your doorway opening is wider than the desired model allows, two units can be mounted side by side to create a protective wall of air.

**IMPORTANT:** Blue Giant recommends that any mounting should be performed by a professional or certified contractor to ensure that the unit is tightly secured and complies with all relevant safety codes.

#### Matching Your Application with a Blue Giant Air Curtain

Blue Giant offers the largest selection of Air Curtains in the industry. Air curtains can satisfy nearly every application requirement. If you do not see your application, please call 1.800.668.7078.
