

*Lighting the way
to loading dock safety*

Interlocked light communication packages provide added safety at the loading dock. Automatic (TLC24-A) and manually operated (TLC24-M) models available to suit site requirements.

Rugged Components

The Blue Giant lights communication packages consist of a low-profile, weatherproof, and impact-resistant control box, LED indoor and outdoor traffic lights, and a mirror image driver warning sign. Available in 115VAC or 230VAC 50-60 Hz input / 24VDC output. CSA-approved.

Quality Visual Management

Easy to install, the TLC24 boxes and slim profile exterior traffic lights are shock and vibration-proof. All lights provide glare-free illumination, and can perform at peak capacity for 100,000 hours, or 10 years of continuous use.

Automatic Lights Communication Package

The TLC24-A can be operated in auto, manual, or bypass mode using a keyed selector switch. Can be interlocked with a vehicle restraint, dock leveler, or overhead door for safe and automatically controlled performance.

Manual Lights Communication Package

The TLC24-M lights are manually changed using a keyed selector switch for operator-directed performance.

Lights Communication Packages

The Blue Giant light communication packages consist of a low-profile, weatherproof, and impact-resistant control box, indoor and outdoor traffic lights, and a mirror image driver warning sign. Automatic and manually operated models available. Available in 115VAC or 230VAC 50-60 Hz input / 24VDC output.
