INSTANT MECHANICAL COMPENSATION FLOAT

- The HVR303 services a wide variety of trailers, including those with bent or damaged ICC bars.
- Ability to adjust automatically to trailer motion ensures compatibility with air-ride suspension systems.

GREEN POWER

- Powered by electricity, the HVR303 is an environmentally sustainable alternative to hydraulic systems.
- Low operating cost: only pennies an hour.
- Can be interlocked with Blue Giant air-powered dock levelers to build a ‘green’ loading dock solution, allowing builders and developers to qualify for government incentives.

INTELLIGENT TOUCH CONTROLS

- The Blue Genius™ Gold Series II Touch Control Panel features include an LCD menu screen, function buttons and a flat-surface keypad with unique touch sensors.
- Interior and exterior LED lights keep drivers and warehouse personnel advised of safety conditions.
- Audible alarm built into the control panel alerts the dock attendant to potentially unsafe conditions, such as broken or missing ICC bars.
- Audible touch buttons and keypad provide instant sound feedback to user input.

A SOLUTION FOR SPECIAL APPLICATIONS

- The HVR303 is wall-mounted, which presents an ideal solution for sites that do not support ground mounting.
- Minimal clearance is required for successful engagement, ensuring compatibility with vehicles that feature an obstructed ICC bar (e.g. vehicles with pintle hitches, B-train connections, and brake modules).

POWDERCOAT

Complete powder coat system prolongs the life of your dock equipment. This process is proven to be an effective rustproof solution which creates a safer work environment.
